## Notes

T<sub>E</sub>XLive is a complex software suite, intended to produce typeset products in various formats (PDF, HTML, DVI, XML to name a few). In all case it takes an *input code* written in a machine-readable form and translates it to an *output format*, suitable to publication in the traditional (hard copy) or electronic form.

This document covers only the software used to convert the input code to the output format. The creation of the input code is outside the scope of this document, since it is done by third party software. T<sub>E</sub>XLive software can accept as input text files created in any authoring tool. T<sub>E</sub>X Users group is aware about fully accessible authoring tools, and promotes them on its web pages and publications.

A separate issue is the accessibility of the *output documents* created with T<sub>E</sub>XLive software. The accessibility features of these documents depend on the settings in the input code and the packages used, and thus is not covered by this document. T<sub>E</sub>X Users Group strives to make the creation of full accessible documents using its tool as simple as possible, and to make the accessibility features the default settings of our software. This is an ongoing effort, involving many developers. T<sub>E</sub>X Users Group welcomes any help in this work.

The tools provided by T<sub>E</sub>XLive are accompanied by technical documentation, both included in T<sub>E</sub>XLive itself, and separate: there are many books, courses and other materials about T<sub>E</sub>X. Many of the latter are fully accessible. The main documentation of T<sub>E</sub>XLive, supported by T<sub>E</sub>XLive team, is accessible as well. Most of the documentation for several thousand software packages in T<sub>E</sub>XLive is provided in PDF or text format. By requiring machine readable textual sources of all documentation provided by T<sub>E</sub>XLive packages, we ensure a certain level of accessibility for all documentation. However, the full audit of the documentation for all 7300+ packages created by many thousands of volunteers is not feasible at this time. T<sub>E</sub>X Users group supports the efforts of making all T<sub>E</sub>X documentation fully accessible.

## Evaluation methods used

## Terms

The terms used in the Conformance Level information are defined as follows:

**Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.

**Partially Supports:** Some functionality of the product does not meet the criterion.

**Does Not Support:** The majority of product functionality does not meet the criterion.

**Not Applicable:** The criterion is not relevant to the product.

**Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

## WCAG 2.x Report

Tables 1 and 2 also document conformance with:

- EN 301 549: Chapter 9 - Web, Sections 10.1-10.4 of Chapter 10 - Non-Web documents, and Sections 11.1-11.4 and 11.8.2 of Chapter 11 - Non-Web Software (open and closed functionality), and Sections 12.1.2 and 12.2.4 of Chapter 12 – Documentation
- Revised Section 508: Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing, and Chapter 6 – 602.3 Electronic Support Documentation.

**Note:** When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

## Introduction

This section of the report describes the documentation for T<sub>E</sub>XLive.

There are several ways to define “the full documentation for T<sub>E</sub>X and friends software”. In one meaning of these words it comprises all books on T<sub>E</sub>X, L<sup>A</sup>T<sub>E</sub>X, ConT<sub>E</sub>Xt and other systems included in T<sub>E</sub>XLive, all issues of the journals published by T<sub>E</sub>X Users Group and other users produced documentation. Of course it would be impossible to estimate the accessibility of all this documentation, comprising hundreds thousands of pages written over three decades.

Another way is to count only the documentation for the packages included in T<sub>E</sub>XLive. This includes documentation for 7300+ packages, which makes the full audit rather impractical.

In this document we discuss only the main manual for the system, available with the installation and at <https://tug.org/texlive/doc/texlive-en/texlive-en.html>. We note, however, that documentation for all T<sub>E</sub>XLive packages is available as source text files, and thus is highly accessible.

In the tables below the success criteria apply to *Web* and *Electronic Docs* paragraphs of VPAT.
